Desired position and salary

Web (Backend NodeJs) Developer

Specializations:
— Other

Employment: full time
Work schedule: flexible schedule
travel time to work: any

Work experience —1 month

March 2023
— till now
1 month

Profiteam

Backed developer

During my time at company, I worked on the backend of small educatoin center's website. My responsibilities included developing and maintaining the server-side logic of the application, managing the data flow between the server and client, and ensuring the website's smooth and efficient performance. I leveraged my skills and knowledge of NodeJS to implement robust and scalable APIs that integrated with the front-end of the website, providing a seamless user experience. My contributions played a vital role in the success of the education center's website, improving its functionality, reliability, and overall user satisfaction.

Education

Incomplete higher

2024   **Ajou University**
                IT, Electic engineer

Languages   **Uzbek** — Native
                English — B2 — Upper Intermediate
                Russian — C1 — Advanced

Skills   NodeJs   ExpressJs   NestJs   MongoDB/Mongoose   REST API   OOP

                Git/Github   Linux Ubuntu   JavaScript   TypeScript

                Server Side Rendering   PugJs   HTML/CSS   Heroku   Docker

                TypeOrm   PostgreSQL   Telegram Bot API / Telegraf.js

                Unit Testing / nestsjs-testing   Unit Testing / nestsjs-testing

Additional information

About me   As a highly motivated and technically proficient Junior Node.js developer,
                I am seeking an opportunity to apply and enhance my skills in creating
                scalable and high-performance applications. With a strong foundation in
                JavaScript, Node.js, and related frameworks such as Express.js and
                Nest.js, I am a quick learner who is passionate about development.

                Although I have limited commercial experience, I have completed several
                personal projects that are already in production, such as the backend for
                the ajou.uz university library and a website for an education center, as
                well as developing Telegram bots. These projects demonstrate my skills
                and dedication to the field of software development.
